2.1 The Client named in the Data Sheet intends to select a Consultant from those listed in the Letter of Invitation, in accordance with the method of selection specified in the Data Sheet.

2.2 The shortlisted Consultants are invited to submit a Technical Proposal and a Financial Proposal, or a Technical Proposal only, as specified in the Data Sheet, for consulting services required for the assignment named in the Data Sheet. The Proposal will be the basis for negotiating and ultimately signing the Contract with the selected Consultant.

2.3 The Consultants should familiarize themselves with the local conditions and take them into account in preparing their Proposals, including attending a pre-proposal conference if one is specified in the Data Sheet. Attending any such pre-proposal conference is optional and is at the Consultants' expense.

2.4 The Client will timely provide, at no cost to the Consultants, the inputs, relevant project data, and reports required for the preparation of the Consultant's Proposal as specified in the Data Sheet.

3. Conflict of Interest

3.1 The Consultant is required to provide professional, objective, and impartial advice, at all times holding the Client's interests paramount, strictly avoiding conflicts with other assignments or its own corporate interests, and acting without any consideration for future work.

The Consultant has an obligation to disclose to the Client any situation of actual or potential conflict that impacts its capacity to serve the best interest of its Client. Failure to disclose such situations may lead to the disqualification of the Consultant or the termination of its Contract and/or
blacklisting by the Public Procurement Monitoring Office/DP.
Without limitation on the generality of the foregoing, and unless stated otherwise in the Data Sheet, the Consultant shall not be hired under the circumstances set forth below:

| a. Conflicting activities                  | (i) Conflict between consulting activities and procurement of goods, works or non-consulting services: a firm that has been engaged by the Client to provide goods, works, or non-consulting services for a project, or any of its Affiliates, shall be disqualified from providing consulting services resulting from or directly related to those goods, works, or non-consulting services. Conversely, a firm hired to provide consulting services for the preparation or implementation of a project, or any of its Affiliates, shall be disqualified from subsequently providing goods or works or non-consulting services resulting from or directly related to the consulting services for such preparation or implementation. |
| b. Conflicting assignments                | (ii) Conflict among consulting assignments: a Consultant (including its Experts and Sub-consultants) or any of its Affiliates shall not be hired for any assignment that, by its nature, may be in conflict with another assignment of the Consultant for the same or for another Client. |
| c. Conflicting relationships              | (iii) Relationship with the Client’s staff: a Consultant (including its Experts and Sub-consultants) that has a close business or family relationship with a professional staff of the Client or are directly or indirectly involved in any part of (i) the preparation of the Terms of Reference for the assignment, (ii) the selection process for the Contract, or (iii) the supervision of the Contract, may not be awarded a Contract. |

4. Unfair Competitive Advantage
4.1 Fairness and transparency in the selection process require that the Consultants or their Affiliates competing for a specific assignment do not derive a competitive advantage from having provided consulting services related to the assignment in question. To that end, the Client shall indicate in the Data Sheet and make available to all shortlisted Consultants together with this RFP all information that would in that respect give such Consultant any unfair competitive advantage over competing Consultants.

5. Corrupt and Fraudulent Practices
5.1 The GoN/DP requires compliance with its policy in regard to corrupt and fraudulent/prohibited practices as set forth in Section 6.

5.2 In further pursuance of this policy, Consultant shall permit and shall cause its sub-consultants and sub-contractors to permit GoN/DP or its representatives to inspect the accounts, records and other documents relating to the submission of the Proposal and execution of the contract, in case of award, and to have the accounts and records audited by auditors appointed by the GoN/DP.

5.3 Consultants shall be aware of the provisions on fraud and corruption stated in Clause GCC 10.1.

6. Eligibility
6.1 The GoN/DP permits consultants (individuals and firms, including Joint Ventures and their individual members) from the eligible countries as
stated in Section 5 to offer consulting services for GoN/DP-financed projects.

Section 7. Terms of Reference

1. Introduction
Following the fourth industrial revolution there has been a rapid rise and integration of
information and communication technologies in our everyday lives. The connectivity
provided by technologies like 4G, LTE, Fiber Optics, ADSL and etc have allowed us to be
interlinked with not only each other but also with the entire world. In this context, Nepal
can now truly be said to be a part of the Global Village.

However, the fact cannot be denied that Nepal is just an adopter of the tools and trends
in the field of ICT. This is not necessarily a disadvantageous position as it allows us to
selectively use the good practices of the Global community and prevent huge
investments in terms of time and money in trial and errors. But this has a disadvantage in
the form that all the international research and experiments in this domain might not be
relevant in the context of Nepal. There certainly is a gap between what we adopt versus
what we require.

An additional challenge that Nepal faces is that of a research oriented academic
environment. There is a significant disconnect between government and academia which
has prevented a research loop from flourishing. It is apparent that a conducive institution
is needed to bridge these two pillars of development and thus promote research on this
domain.

Ministry of Communications and Information Technology (MoCIT) has been periodically
formulating and reviewing laws and policies regarding communication, information
dissemination and internet technologies. These regulations and policies are aimed at
improving the way that people communicate with each other via different electronic
mediums; internet in particular. MoCIT recognizes the potential of ICT, the importance of
research in this domain and the immediate need of an institutionalized approach for the
promotion for the same i.e. a National ICT Research Center.

2. Objectives of this Study
- To provide a strategic overview on the vision and mission of NICTRC and
summarize current ICT research environment in Nepal.
- To identify the elements of the ecosystem within NICTRC, highlight its
necessity and prepare a concept note
- To identify and summarize the global best practices of ICT research centers
around the world.
• To understand and identify the elements and relationship of the NICTRC tenants and ecosystem along with the organizational structure
• To identify and suggest activities within NICTRC to create the dynamic environment for the continuous growth of the research center for promotion of ICT research in Nepal.
• To determine types of R&D labs that would be feasible for NICTRC to offer to compliment and promote the Nepalese ICT industry.
• To estimate space and area to be allocated for the labs, incubators and ancillary facilities and services that will be required.
• To assess potential/ types of client for the research center.
• To prepare a high level Capital Cost estimation for establishment and operation of NICTRC including its Cost Benefit Analysis.
• To prepare impact assessment and risk mitigation measures for establishment of NICTRC.
• To aggregate all results and prepare a comprehensive Feasibility Study of NICTRC.

3. Scope of the Study

• The consultant shall perform need analysis and projection of the future along with the present assessment, prepare a concept note of the NICTCR and benchmark against competing top 3 ICT research center in the region.

• The consultant should define the pricing for R&D labs and other amenities which has to include prices for each type of facilities along with suitable alternatives.

• The consultant shall perform case studies of three international ICT research centers and compile their organizational structure, working scope, facilities and financial capabilities, best practices and overall functional architecture and business processes.

• The consultant shall conduct at least five focused group meetings with officials from related ministries including stakeholders from the field of academia, students, private corporations and take into consideration, their needs and opinions while drafting the report. The consultant shall also compile a separate report outlining the discussions done in these focused group meetings.

• The consultant shall provide insightful conclusions and suggestions for the next phase in the establishment of NICTCR.
